ABDUL BASIT

Associate Software Engineer

+92 302 9230137 | abdulbaset1878@gmail.com | linkedin.com/in/abdul-basit-naeem | github.com/Abdulbaset1

SUMMARY

Computer Science Fresh graduate with hands-on full-stack development experience in Python, JavaScript/TypeScript, and REST APIs, plus applied AI/ML and deep learning project work. Comfortable across the stack react/Node.js, SQL-backed backends, and cloud (AWS) — and quick to pick up new tool. Eager to work on real-world projects and contribute to impactful software engineering solutions.

EDUCATION

Bachelor of Science in Computer Science

FAST — National University of Computer and Emerging Sciences | Aug 2022 – Jul 2026

TECHNICAL SKILLS

- **Languages:** Python, C++, JavaScript, TypeScript
- **Web & APIs:** React, Node.js, Express, REST APIs, HTML, CSS, jQuery
- **Databases:** PostgreSQL, MongoDB, Oracle Database, Firebase, SQL
- **Software Engineering:** Git/GitHub, SDLC, Agile/Scrum, OOP, Linux, CI basics, Docker (familiar)
- **Cloud & Monitoring:** AWS (EC2, VPC, S3, Security Groups), Ceph, Prometheus, Grafana, Sensu
- **AI/ML & LLMs:** PyTorch, TensorFlow, Hugging Face Transformers, LangChain, CNNs, GANs, Transformers, Autoencoders
- **Data & Tooling:** NumPy, Pandas, Scikit-learn, FAISS, OpenCV, Matplotlib, Kaggle, Google Colab, Jupyter, VS Code
- **AI-Enabled Development:** GitHub Copilot, Claude Code, Cursor, Antigravity, Lovable
- **Soft Skills:** Problem Solving, Fast Learner, Adaptability, Team Collaboration, Time Management

PROJECTS

XcelTrack — *Cell-level version control for Excel* View Repo ↗

- Built a full-stack tool with a React frontend and an Express/PostgreSQL backend to track cell-level edits, synchronize changes, and resolve conflicts.
- Added Firebase-based admin sync and documented development and production build steps.

E-commerce Store — *Windows Forms desktop app with Oracle backend* View Repo ↗

- Developed a C# Windows Forms frontend with an Oracle backend supporting login and signup for Customer and Admin roles.
- Implemented a 3-tier auth system with business logic and data access layers using ADO.NET and Oracle stored procedures for secure CRUD and role-based access.

Document-to-Markdown VLM — *Vision-language model fine-tuned with QLoRA* View Repo ↗

- Fine-tuned Qwen2-VL, a vision-language model, using QLoRA to convert document images directly into structured Markdown text.
- Built an interactive Streamlit app for uploading documents and generating/downloading Markdown output.

Cloud Infrastructure on AWS — *VM provisioning, RAID 6 storage & monitoring stack* Blog Post ↗

- Provisioned and secured Linux VMs on AWS EC2 — SSH key-pair access, custom Security Group (firewall) rules, RDP access, and a public HTTP file server.
- Designed a fault-tolerant distributed storage architecture using Ceph erasure coding (RAID 6 equivalent, tolerating 2 simultaneous node/disk failures) and built an observability pipeline with Sensu, Prometheus, and Grafana for real-time cluster monitoring.

RAG-Based Diagnostic Reasoning System — *Retrieval-augmented QA over clinical notes* View Repo ↗

- Built a Retrieval-Augmented Generation (RAG) pipeline using LangChain and FAISS for context-aware question answering over clinical notes.
- Reduced LLM hallucinations by grounding responses in retrieved source documents.

Doodle-to-Real Image Translation — *Conditional GAN (Pix2Pix) in PyTorch* View Repo ↗

- Developed a Pix2Pix-based conditional GAN using PyTorch to translate hand-drawn doodles into realistic images.
- Implemented a U-Net generator and PatchGAN discriminator for paired image translation and automatic colorization.

Image Caption Generation — *ResNet-LSTM captioning model* View Repo ↗

- Built an image captioning model using PyTorch with a ResNet-LSTM architecture for automatic caption generation.
- Trained and evaluated the model on the Flickr30k dataset using BLEU score.
